Adrian Solarczyk

Full-stack Engineer

About Me

I am a full-stack engineer with a passion for building great products. I have a strong background in web development and I am currently working full-time as a Software Engineer. I have a strong interest in the latest technologies and I am always looking for opportunities to learn something new. My commercial background tech stack consists mostly of JavaScript, TypeScript, React, Node.js, and GraphQL.

Bachelor of Engineering, Robotics

Wroclaw University of Technology

Hobbies & Interests

- **Music** - I am a big fan of all of kinds of electronic music. I like to listen to it, but also to produce it. However none of my tracks have been released yet.
- **Gaming** - I like to play games, especially multiplayer games like MMORPGs, MOBAs, FPSs, etc. I also like to play board games with my friends. Once I even organized a online game tournament roled as a coordinator, but I was also looking for sponsors.
- **Programming** - I like to learn new things and experiment with new technologies. I also like to contribute to open source projects. Most of all I like to build things that are useful for others. I am contributor to a HTTPie app.
- **Cars** - I am a big fan of traditional combustion engines. I like to drive and I like to work on my car. I also like to watch and participate motorsport events or car meetings.
